

## ACCESSORIES

The 3S controller accessories range includes float switches, electrode probes, level sensors (4–20 mA), pressure transmitters (4–20 mA), and other signal devices. They are designed for confined spaces, corrosive environments, high-vibration conditions, and other challenging scenarios, ensuring stable signal transmission and safeguarding system operation. Various cable lengths are available (standard: 1 m to 10 m), with customized lengths supported upon request.

We can also provide additional types of signal devices based on your project requirements. Please contact our sales team for more information.

3S Float Switches & Liquid Probes | Reliable Level Control for Water & Pumps

3S High-Precision Pressure Transducers For Hydraulic & Water & Gas Systems

3S Hydrostatic Liquid Level Sensors | Continuous Monitoring, Anti-Clogging

3S Iron Duplex Pump Control Box for Reliable Drainage & Water Supply

Stainless Steel Duplex Pump Controller - IP55 for Municipal & Irrigation Systems

IP55 Industrial Dual Pump Starter for Sewage Treatment & Aquaculture Farms
